As a Full Stack Developer with a background in Systems Engineering, I have acquired skills that have enabled me to work effectively in teams and also swiftly analyze code in search of errors or enhancements. I possess knowledge of GIT, data structures, and algorithms. On the Front-end, I have experience using technologies like React.js and Tailwind, allowing me to create responsive web applications. On the Back-end, I have worked with technologies such as Node.js, Express, and PostgreSQL to develop server functionality. English Proficiency Level: C1(Advanced).

EXPERIENCE

Front End Developer – Zicofy

01/11/2023 – 01/12/2023

Internship.

Led the UX design for ZicoChat AI ensuring a user-friendly interface and a seamless interaction experience. Implemented UX research methodologies and testing activities to analyze and predict user behavior, optimizing the platform's user-centered design. Technologies: Figma, JavaScript, TypeScript, and React Native.

Full Stack Developer – Techno APES

01/10/2023 – 01/11/2023

Internship.

Develop a video on demand App, so that clients can instruct their employees in the services offered by Techno APES. Technologies: AWS (S3, Cognito, Lambda, Amplify, EC2), JavaScript, TypeScript, Serverless framework implementing microservices in Node.js and Express, and React.js for the Front-End.

PROJECTS

Full Stack Web Developer – Molo

03/08/2023 – 30/08/2023

Freelance Experience.

Ecommerce for a clothing store, with the aim of allowing users the possibility of acquire clothing without the need of attending the physical store. I use technologies like React.js, Redux, Tailwind, Node.js and Express, and user authentication through Supabase. MercadoPago's CheckoutPro was used to handle the transactions.
